

Travel grant report

I'm pleased to send you the report concerning the trip I made in India in the framework of the 50th LCI conference.

First, I strongly thank on the behalf LC Burundi and on my behalf take part in that conference through "Association member Fund". The trip has been very long and the stay there was very wonderful in such extend that I would rather stay there a long time, this because of the warm welcome and hospitality that Indian ladies reserved to us in general and particularly my hostess NEETHA.

I have been well received in her family. I felt as if I was at home and I didn't feel foreigner. Thank you so much Neetha.

Before I arrived there, I was afraid with my English but surprisingly I managed to make the conversation with NEETHA and her friends, and together we shared experiences of both our countries concerning the sociocultural, religious and others domains. I was impressed to see how the Indian women support their mother-in-law.

As far as the conference is concerned, I followed all activities from the beginning to the end even through there was no one to interpret me. Of course I didn't understand everything but I managed to gather some notions which are beneficial to my country.

It was the second time that I took part in such conferences and in this one I once understood the organisation and objectives of LC.

In conclusion, this stay in India has been very beneficial both to me and my association.

Recommendations:

We would like that many members from countries which there are not developed could be massively represented in such conferences very important and in the interesting activities organised by LCI.

Thanks!

UWIMANA Sylvie, NP LC Burundi
